

The Creative team identified that within organisations there was a need for printing facilitation. Our objective was then to provide organisations with a cost effective and efficient printing service.

The creative team facilitates organisations printing requirements through a vast supply chain of printing houses. All the printing houses are given the opportunity to compete for the work, and the jobs are given to the houses that are the most cost effective.

All our printing partners have gone through a screening process to ensure that quality and required time frames are met.

Some of our product offerings include but are not limited to:

- Artwork Design
- Colour to full colour business cards
- Brochures
- Booklets
- Annual reports
- All types of forms
- Raffle Tickets
- Invoice and receipt books
- Presentation folders
- Letterheads
- Invitations
- Envelopes
- Gift vouchers and more...
- A complete range of ancillary services such as gluing, collating, hole punching and drilling, is also available.

Printing Styles include: Raised Printing

Raised Printing or thermography, is a print process that produces a raised print image, producing a distinguished look.

This process is especially appealing for the printing of certain types of logos and other graphics as the raised image stands out on the paper / letterhead

Printing / Foil Stamping & Embossing / Debossing

Foil stamping, hot foil stamping, foil printing, hot foil stamping, foil print, foil stamper, dry stamping, foil imprinting, leaf stamping or foil stamp design are all terms used to describe the art of hot foil stamping. Foil stamping uses heat and metallic foils to create a shiny metallic eye catching finish on goods such as packaging, wedding invitations, invitations, personalised stationery, corporate stationery, gift cards, brochures and presentation folders.

Embossing raises the surface of paper stocks to transform ordinary, flat paper into 2 dimensional and / or 3 dimensional designs.

Debossing however depresses the surface of the paper - indenting the stock with an image. Call us to discuss how to best embellish your art work with foil printing / embossing or debossing

Color poster printing is a high-impact, affordable way to make a great impression. Ideal for window placement, bulletin boards or product releases, our full-color printed posters are gloss coated for durability. Use them whenever you need to get noticed.

Colour Booklet printing

Colour Booklet printing is ideal for custom sales catalogs, consumer catalogs, journals, instruction manuals, technical manuals, meeting programs, convention programs, pamphlets, exhibition guides, annual reports, and product booklets. 5½" x 8½" printed catalogs and booklets can be configured to meet your printing requirements.

For more information on our printing services, please contact your account manager or the customer service team.
